SAGANMORROW.COM

About Your Speaker...

Sagan Morrow (she/her) is an anti-hustle Productivity Strategist, internationally board-certified Success Coach, and professional speaker with more than 10 years of experience as a business owner (both in sole proprietor and business partnership capacities). She has provided coaching and consulting services to other entrepreneurs and community groups to get powerful productivity results since 2016.

Graduating from the University of Winnipeg with a degree in Rhetoric, Writing, and Communication in 2010, Sagan immediately became a freelance communications specialist for a local public relations firm, and soon became the coordinator of a fruit-sharing organization (including the management of 350 volunteers, planning and facilitating workshops, and creating foundational structures for the organization). She worked at a charitable organization for three years as the youth programming coordinator, fundraising lead, and community liaison, in which she further developed her skills and expertise at hosting workshops and conference sessions, creating and implementing strategic plans, and coordinating campaigns and events.

In 2016, Sagan began teaching online courses dedicated to other entrepreneurs to improve their productivity and organizational skills as they build their own businesses. She specializes in teaching entrepreneurs and teams how to save 10+ hours/week, streamline systems, increase motivation, build accountability, achieve work/life balance, and get more done in less time—without burnout or overwhelm. Her unique productivity methodologies receive rave reviews and are adaptable to a variety of different groups and individuals.

Sagan is an alumnus of the Anti-Racism Leadership School, has a background in community leadership and team management, and is an internationally board-certified Magnetic Coach® with 120+ hours of training. She is the author of *The Business of Writing & Editing: Practical Tips & Templates for New Freelancers* and has taught hundreds of clients through her online courses for entrepreneurs.

Sagan has created and presented workshops for organizations such as Editors Canada, MeetEdgar, Small Business BC, Canadian Freelance Guild, and So She Slays. She has been featured as a guest expert for podcasts and conferences 45+ times within the past two years. Her work has appeared in a variety of publications, including The Ladders, Kobo, and Rising Tide Society. As of 2021, she lives in Kamloops, BC.

Replying to @Saganlives and @editorscanada

Your presentation was excellent. I started out skeptical and ended up a convert. Well done! #Editors21

Alicia Chantal
@FreshLookEdit

Great session on completing performance reviews from @Saganlives. Sagan always has such helpful, actionable advice to help with the business mindset. #Editors21

Sagan Morrow

About the Productivity Workshops...

Productivity Strategist Sagan Morrow offers three productivity workshops for your organization:

1. **Productive Plans** (for project managers & team leaders)
2. **Productive Teams** (for anyone/everyone in your workplace)
3. **Productive Leaders** (for organizational leaders & executives)

Each workshop includes the complimentary Level 1: Foundations of Productivity training (plus certificate of completion for all attendees). Certificates of completion will be issued to each attendee for each of the three streams to indicate that attendee's proven skill and ability as a Productive Planner, Productive Team Member, and/or Productive Leader.

All of these half-day workshops are designed for 2 – 15 members and can be adapted for virtual or on-site trainings. We recommend booking all three workshops for the full experience (the Deluxe Package), however you can also book just one or two workshops, depending on your organization's needs. Sagan can advise on your unique situation.

Sagan is based in Kamloops, British Columbia. If your organization is in the region, we can conduct the workshop on-site at your place of business (*travel fees may apply*). For organizations in other parts of the world—or if your team prefers a remote/socially-distanced training experience—then we can easily accommodate your requirements. In that case, we will conduct the workshop virtually, via a video platform such as Zoom.

Because of Sagan's unique and highly customizable productivity methods, her workshops are appropriate for a variety of different types of organizations, including but not limited to:

- ✓ Corporate offices & small businesses
- ✓ Theatre or arts & culture groups
- ✓ Associations & agencies
- ✓ Non-profits & volunteer groups

After attending this workshop, your team will be working more efficiently than ever, truly enjoying their daily workload, producing faster and higher-quality results, and staying motivated and on track with projects like never before—all while maintaining healthy work/life balance and avoiding burnout or overwhelm.

>> Contact Sagan Morrow at hello@saganmorrow.com to book your workshop <<

Each workshop features a pre-session interview to ensure we customize your workshop(s) to your organization's unique needs. Fully customized workshops are also available upon request. Workshops are subject to availability. We recommend booking your spot sooner rather than later so you get priority access to your preferred schedule and timeline.

Workshop #1: Productive Plans...

Ideal for your organization:

You are constantly putting out fires and dealing with urgent or emergency situations. You're tired of always reacting to problems, and you're ready to become proactive... You're ready to get ahead on tasks, and you want to finally identify problems in advance—to solve issues before they even *become* problems!

About the workshop:

What if you didn't have to look over your employees' shoulders and micro-manage their work on a daily basis? What if you didn't have to check your email outside of regular office hours for inevitable emergency situations? What if you could breathe easy, knowing that you are ahead of schedule and problem-free in the workplace?

PRODUCTIVE PLANS enables you to become proactive, anticipate and solve problems before they arise, and meet deadlines with ease.

If you don't have standard policies & procedures across all aspects of your organization (or if they're gathering dust in a drawer), if your onboarding sequence for new team members is haphazard at best, and if the office is in disarray anytime a team member goes on vacation or maternity leave... then it's time to make a change.

Learning outcomes:

By the end of this workshop, attendees will have a comprehensive understanding of the following:

- ✓ How to identify & replicate systems you've already created—so that you stop needing to reinvent the wheel every week
- ✓ How to pinpoint problem areas within your organization & problem-solve in advance—so that you stop spending all your time putting out fires
- ✓ How to ensure you make excellent use of your standard policies, procedures, systems, and strategies—so that all of your hard work pays for itself again & again, for months to come

Process:

This workshop is divided into three training components:

1. Productivity audit & assessment
2. Review of your organizational needs
3. Development of onboarding sequences and documentation manuals

Who should attend: This workshop is best suited for project managers & team leaders.

All workshop attendees will receive a Level 2 (Productive Planner) certificate of completion

Workshop #2: Productive Teams...

Ideal for your organization:

Tasks are slipping through the cracks, messages don't always get through clearly to one another, the office feels disorganized, and team members are missing deadlines. You're frustrated with the frantic nature of your workplace and want the whole team to work more cohesively, with ease... You're ready for everyone on the team to have better time management & task management skills!

About the workshop:

What if you didn't have to worry about whether there's enough time for your team to complete all of their tasks? What if you had a group of team members who feel confident in their time management and task management abilities... and who are focused and on track with all projects and goals? What if your organization broke free of industry norms, and took a fresh new approach that works exponentially better for your team's success?

PRODUCTIVE TEAMS enables all of your team members to save 10+ hours every week and work together as a streamlined, cohesive unit—supporting one another and working together, without burning out.

If your team is notorious for their time management and task management skills, and if you are in desperate need of extra time each week... then it's time to make a change.

Learning outcomes:

By the end of this workshop, attendees will have a comprehensive understanding of the following:

- ✓ How to implement personality-based productivity strategies—so each unique individual on your team is more productive than ever
- ✓ How to critically analyze your industry norms & standards—so that you stop using outdated methodologies
- ✓ How to use the right time management & task management systems—so that your team members save 10+ hours/week, every week

Process:

This workshop is divided into three training components:

1. Learning style & personal productivity assessment
2. Review of your industry norms & standards
3. Time management & task management strategies for immediate implementation

Who should attend: This workshop is best suited for *everyone* on your team to attend.

All workshop attendees will receive a Level 2 (Productive Team Member) certificate of completion

Workshop #3: Productive Leaders...

Ideal for your organization:

Your organizational mission statement and vision *sound* good, but they aren't actionable... they're vaguely worded, and there is a disconnect between your organization's mission/vision, compared to the tasks your team is actively working on... You're ready for everyday actions in your workplace to match up and align with your organizational vision and values. You're ready to walk your talk—to go from vague to visionary!

About the workshop:

What if your decision-making was transformative and forward-thinking? What if your organization's vision and mission statement were easily understood by all team members, and guided the everyday actions for successfully achieving your long-term goals? What if you didn't spend so much time on busy work, and instead focused on productive tasks that move the needle forward? What if you stopped having meetings for the sake of meetings?

PRODUCTIVE LEADERS enables you to stop glorifying busy work, to start being truly strategic, and to empower your team with the skills and support they need to be the amazing, ideal employees you've dreamt about.

If there's a disconnect in your organization, and if you're focusing more on busy work than productive work... then it's time to make a change.

Learning outcomes:

By the end of this workshop, attendees will have a comprehensive understanding of the following:

- ✓ How to have visionary leadership at your organization—so that your team is best supported to carry out their duties in support of your mission
- ✓ How to lead meetings that are useful for your organizational goals—so that you stop wasting time
- ✓ How to be strategic and intentional at every level of your role—so that every task and project at your organization contributes to meaningful development

Process:

This workshop is divided into three training components:

1. Mission statement & vision assessment plus decision-making matrix
2. Review of your existing routine organizational practices
3. Performance review & audit strategies for improved progress & goal achievement

Who should attend: This workshop is best suited for organizational leaders & executives.

All workshop attendees will receive a Level 2 (Productive Leaders) certificate of completion

Testimonials & Praise...

"Before working with Sagan, I spent the majority of my day putting out fires because I was behind on my tasks or I didn't have the time to see where my team was at on their tasks... only to realize they were behind as well. Then the client reached out wondering where their project was at and I had to tell them the bad news. Now, I am more proactive than reactive, and the majority of tasks are either ahead of schedule or right on time!"

My team is working much more efficiently, now that I have a more productive plan that has us moving forward rather than in circles. Sagan's coaching has absolutely started me and my team down a better, more productive path!

I cannot tell you how amazing it is to actually 'shut off' from my workday and focus entirely on my family in the evenings. The productivity skills I learned from Sagan save me at least 6 hours every week... Not to mention the emotional benefit of closing out my work computer at the end of the day, with full satisfaction of everything I accomplished that day."

- Anabeth, Project Manager

"I invited Sagan several times in my community to share her expertise for one single reason: she's remarkable at what she's doing because she will help you to design productivity on your terms, taking into consideration your productivity style, your learning preferences, your mindset and energy management.

It's not surface level productivity that she will offer to you; it's the work to dig deeper to uncover your productivity and make it yours for you and your team.

She helped my community empower themselves, being productive in their business while honouring their well-being, which is the testament that Sagan is excellent at what she's doing."

- Gaelle, Motivational Speaker & Wellness Expert

@ilanareimer

Just finished a phenomenal freelance business planning webinar with @Saganlives, hosted by @editorscanada. It was such an accessible, motivating talk. Admin stuff usually makes me go bug-eyed, but now I'm pumped!
